

1. When you first click on the EVA update download link, Internet Explorer will ask if you want to *Run* or *Save* the file EVA.exe.

Be sure to click on the *Save* button.

2. Once the file EVA.exe has been downloaded, Internet Explorer will ask if you want to *Run*, *Open folder*, or *View downloads*. Click on the button *Open folder*, so that you can see the location of the new EVA file.

3. The new EVA file will most likely be in your Downloads folder (below), since this is the default location that Windows chooses. It's okay if you have another location set as your default; just go to that folder instead.

4. Now that the new EVA file is on your computer, you'll need to navigate to the directory where this new file needs to be placed. Start by choosing *Computer* from your Start Menu. This step will open a new window in Windows Explorer.

5. You should now have two windows open on screen -- one showing your Downloads folder, the other showing your hard drive [Local Disk (C:)] and any other drives present. Double-click on the icon for *Local Disk (C:)* to continue.

6. Next, double-click on your *Program Files* folder to continue navigating to your EVA folder. Note: If your computer is a 64-bit machine, you will have both a *Program Files* folder and a *Program Files (x86)* folder. In this case, your EVA folder will be inside the *Program Files (x86)* folder, so double-click on that instead.

7. Now double-click on the *EVA* folder to open it.

8. Inside the EVA folder is the old EVA application file that you need to replace. Note that the old file has a "Date modified" of 9/9/2009.

9. Now, go back into the Downloads folder on your desktop, click down and hold on the new EVA file, and drag it into the EVA folder in the other open window. Windows 7 will ask what you want to do; choose the option to *Move and Replace*.

10. At this point, you may see a message that says "Destination Folder Access Denied." If you do, just click on the *Continue* button.

11. Your replacement of the old EVA file with the new updated EVA application should now be complete. Check the "Date modified" of the EVA application in the EVA folder; it should now be the same as the date you downloaded the update.
